- The UB-2100VECK has the power and performance of a large machine combined with the portability needed for shops of all sizes. Connect it directly to your machines for point of generation dust control
- Meets OSHA requirements by significantly reducing the amount of airborne particulate in your shop
- The UB-2100VECK provides more than enough airflow to collect particulate from multiple machines and is good for central installations
- The motorized automatic filter cleaning system ensures that the canister filter is always ready for the next use. The optional remote control allows you to start the dust collector from anywhere in the shop
- It is the ideal dust extraction system for the woodworking industry and for other industries where fine fibrous airborne dust is a concern
- Innovative impeller design ensures a quiet operation
- Provides 1600 CFM of airflow. More than enough to collect particulates from multiple machines
- The cyclone separator system removes the particulate from the airflow before it enters the impeller
- The dust collector is mounted on casters. It can be easily maneuvered around the shop
- 6" suction inlet with "Y" connector with two 4" inlets
- The 28 gallon steel drum is mounted on casters so that it can easily be rolled away for emptying
- The recovery drum has a window on the side so you can easily see when the drum is full
- Poly liner recovery bag can be inserted in the recovery drum to facilitate emptying
- An inner frame (bag holder) is provided to keep the poly liner recovery bag in place
- The final stage of filtration is a canister filter with 1 micron efficiency which prevents fine dust from escaping into the shop
- The canister filter is made of a pleated media and reinforced with steel mesh
- Remote control included
- UB-2100 shipping dimensions as follows: 45" x 46" x 30". Weight 309 lb (1 box)
